 Astigmatism

## Features & Benefits

- Optimised Toric Lens Geometry<sup>TM</sup> incorporates special design features to provide excellent orientation<sup>1</sup> and stable fit for consistently clear vision.
- Aquaform Technology locks in water – so you can have incredible comfort all day long – and helps your eyes stay clear and white, by delivering the oxygen your eyes need.\*
- A smooth surface with special rounded edges enhance comfort by minimising interaction between your contact lenses and your eyelids.

\* During daily wear.
